Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

In a file management system, users are required to provide a valid file name when creating new files. The system enforces specific rules for file names to maintain consistency and avoid potential issues. Your task is to implement a Java program named `FileNameValidator` that takes user input for a file name and validates it according to the specified rules.

Rules for Valid File Name:

The file name must consist of alphanumeric characters (letters and digits) only. The file name must have a minimum length of 3 characters.

Implement a custom exception, `FileNameValidator`, to handle cases where the entered filename does not meet the specified criteria.

Input Format

The input consists of a string S, representing the desired filename.

Output Format

The output is displayed in the following format:

If the entered file name meets the specified criteria, the program outputs

"Valid file name"

If the entered file name does not meet the criteria and triggers the `InvalidFileNameException`, the program outputs

"Error: Invalid file name. It must be alphanumeric and have a minimum length of 3 characters."

Refer to the sample output for formatting specifications.

Sample Test Case

Input: myfile123

Output: Valid file name

Answer

```
import java.util.Scanner;

class InvalidFileNameException extends Exception {
    public InvalidFileNameException(String mes) {
        super(mes);
    }
}

class Main {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        try {
            String file = sc.nextLine();
            if(file.length() <= 3 || !file.matches("[a-zA-Z0-9]+")) {
                throw new InvalidFileNameException("Error: Invalid file name. It must
be alphanumeric and have a minimum length of 3 characters.");
            }
        }
    }
}
```

```
        System.out.println("Valid file name");
    }
    catch(InvalidFileNameException e) {
        System.out.println(e.getMessage());
    }
}
}
```

Status : Correct

Marks : 10/10
